

LEAD YOUR REVOLUTION

FOR CLEAN ENERGY IN
AMERICA
@TAKERESPONSIBILITY.US

LET IT BE KNOWN:

that as the CO2 emitters lobby and the US Senate limps, as our economy lags and as our Nation loses – the American people are mounting a revolution. We see our jobs drying up like oil wells. We witness America's wealth flowing like a pipeline to Multi-National Corporations, Utility Monopolies and Middle East Dictators when our money should be spent locally building clean power projects in our communities and brightening our future. The fossil fuel economy has polluted the water we drink, dirtied the air we breathe and is now endangering the climate that sustains life on earth.

LET THERE BE NO WAVERING:

energy pollution is un-American and unconscionable in the 21st century. We will not accept our democracy to be run by the polluting energy industry and their corrupt politicians any more than we did not accept the British Monarchy and East India Company to run our colonies, any more than we did not accept the slave industry to deny the emancipation proclamation, any more than we did not appease Hitler, any more than we did not accept segregation as the law of the land. In America's history of epic change making, government does not lead, corporations do not dictate, we the people do.

LET US TRANSFORM OUR NATION:

we are rising up to assert a fundamental duty to be responsible in freedom and thereby live up to our God given rights of life, liberty and the pursuit of happiness. Our entrepreneurial spirit is great and so is our resolve to replace the unsustainable energy of old with a clean energy future for all. One by one we the people will take vital matters of power generation, sustainability and survival into our own hands. Now, for our sacred honor and the sake of future generations, the American people are leading an epic transformation, one which will become known as the cleanest revolution in history.

**...WE ARE BEING SUMMONED ONCE AGAIN
TO LEAD A REVOLUTION.**

LEADY

HERE'S HOW:

LEAD YOUR REVOLUTION!

Make a definitive change, a revolution, in your own life. In at least one extraordinary way demonstrate your non-cooperation with the fossil fuel economy of old; and in at least one new and defining way embrace the pollution free energy of the future. Really commit to your change, as this is your personal revolution. Lead by example. Whatever you choose to do make it count and follow through with it. There are simple, fun and profound ways to change... See what others have done and are doing @ www.takeresponsibility.us and then lead your own revolution!

PROFILE YOUR REVOLUTION!

Personalize the change you are making by exhibiting your exemplary efforts, your personal commitment, your revolution on your very own web-based **REVOLUTION PAGE**. Creatively profile your action experience with pictures, journal entries, lessons learned, humor moments and/or other unique expressions of what you're doing and why it's meaningful. Log-on to Lead Your Revolution Project @ www.takeresponsibility.us to create your revolution page.

SHARE YOUR REVOLUTION!

Pass your revolution on to others: share your revolution page through your e-mail lists, to your friends, to your family, through your facebook and twitter accounts, at work or at school. Don't be shy: share what you have done and are doing, share what you learn and what you have given so others you care about can be so inspired – so that others may make a difference in their own way and pass it on through their associations, so that we together lead a revolution!

...Ultimately, through these steps, we the people of this brave & innovative land are hereby syncing a new era of personal responsibility with the ripple effects of social networking to lead the clean energy revolution.

THE CLIMATE CHANGE LEADERSHIP INSTITUTE (CCLI)

is a local non-profit organization and civil society association helping to generate a sustainable future based on clean power, innovation and conservation. Spurring on America's clean energy revolution is not only a vital volunteer mission for CCLI, it is something we can all strive towards together for the sake of future generations.

CCLI'S PRIORITIES:

EDUCATION

We provide *stewardship workshops* at schools, offer *paid student internships* & use the new media, world-wide web & internet to promote progress;

SEED GRANTS

We support young people's solutions to the climate crisis thru our *Direct Action & Innovation Grants*; we help those unduly affected by US climate pollution thru our international *Justice Grants*;

INCENTIVES

We honor society's epic change-makers thru our *Climate Courage Awards*. We recognize ordinary people's extraordinary efforts thru our *Conservation Quest leadership medals*.

ACTION

We call for public participation in clean energy and climate stewardship thru our *Power Pledge*. We raise critical awareness & spawn transformational change thru *Annual Projects (Water for the World, Drive for Sustainability, Conservation Quest, Lead Your Revolution)*.
