

C Change Project

The **C Change Project** is about **c**onnecting & mobilizing **c**aring people to vital platforms addressing global **climate change**. Rise up & **see** a bright horizon, **c**ollaborate & *lead a sea change* in America not only to phase-out **c**arbon dioxide emissions (**CO2** + GHG equivalents) but to renew the economy, restore our integrity & invigorate the beloved **community**.

1. Commit to 100% Renewable Energy-> Power our economy & electric grid with 100% renewable energy ASAP (include demand response, battery storage, grid integration) while fully phasing off coal, natural gas & other polluting sources. Benefits: greater health, lower & stable utility bills, jobs, rural investment, ecosystem/water savings. Read: [go100re](#); [McKibben](#); [Draw Down](#). Join the movement @ [Solutions Project](#) + [350.org](#) + [NewEnergyEconomy](#) & choose renewables wherever possible @ home, work & in your **c**ommunity.

2. Demand Clean Transportation-> Phase out fossil fuel vehicles in favor of the electric vehicle (EV) revolution (like China, California, UK & many others are doing). Benefits: public health (no exhaust), avoided maintenance costs, defeating pollution w/ innovation. Read: [latest developments](#); [Half the Oil](#); [RMI's Report](#). Join the movement @ [OffFossilFuels](#) + [UnionofConcernedScientists](#) + [PluginAmerica](#); **c**all on our representatives to ban the sale of gas powered cars ASAP; [integrate EV w/ a RE grid](#), support sustainable **c**ompanies like Tesla & Volvo (going all electric by 2019); walk, bike, use public transit & resist fossil fuels AMAP.

3. Deploy Mother Nature / Carbon Capture > Achieve unprecedented **c**arbon sequestration thru wide-scale native grass, vegetation & tree planting, soil restoration, sustainable agriculture + **c**arbon trading for ranchers & farmers. Benefits: rural economic development, lasting productivity, pollution mitigation, water savings. Read: [A solution under our feet](#); [A Texas Plan](#). Join the movement @ [QuiviraCoalition](#), [OneTreePlanted](#); build bridges w/ rural America, do permaculture; offset **CO2**; [volunteer](#); [plant trees](#); frequent farmers markets.

4. Enact a Nationwide Revenue Neutral Carbon Fee & Dividend-> Put a price on **c**arbon ASAP, put an end to externalities & start a new era of responsibility for the **c**ommons. Benefits: a non-partisan, market solution to phase out **CO2** pollution; a better economy. Read: [Lobbying for the Greater Good](#); [The Case for a Carbon Tax](#). Join the movement @ [CitizensClimateLobby](#); help a CCL chapter; start accounting for your environmental impact like [Boulder](#), **c**ompanies like [Puma](#) & NGO's like [CCLI](#) offer.

5. Conserve Like Life Depends On It-> As we lead a **climate sea change** in America, capture and phase out emissions from the marketplace, make **c**onservation an utmost priority. Benefits: soul force, utility bill savings, energy & water savings. Read: [Half Earth](#); [Reinventing Fire](#). Join the Movement: @ [energy4me](#), weatherize households in need, [limit consumption](#), embrace efficiency, take **c**are of water (visit [Soil & Water Conservation Society](#) and join local efforts like [RioGrandeWaterKeepers](#)).

6. Rise for Climate Justice-> stand up for social equity & **c**limate action at once. Read: [Climate Justice Resources](#); [Green for All](#); [This Changes Everything](#). Join the Movement @ [MRFCJ Principles](#) + [Climate Alliance](#) + [Indigenous Env Network](#); team up w/ local environmental & social justice organizations (like [EarthCare](#) & [ChainBreaker](#)); deploy non violent direct action & civil disobedience to enact earth-scale **c**hange.
